

SWARNENDU PRAMANIK

PROFESSIONAL SUMMARY

Dedicated and detail-oriented SOC Analyst with experience in monitoring, investigating, and triaging security alerts within a 24x7 Security Operations Center (SOC). Skilled in Splunk Enterprise Security (ES), CrowdStrike Falcon, log analysis, incident response, and ticket management tools. Adept at identifying potential security threats, conducting initial investigations, and following established playbooks to ensure timely threat detection, accurate incident response, and continuous improvement of organizational security posture.

CYBERSECURITY SKILLS

- **SIEM Tools:** Splunk Enterprise Security (Splunk ES)
- **Endpoint Security Tools:** CrowdStrike Falcon
- **Ticketing & Incident Management Tools:** AIOps, Motadata
- **Security Monitoring:** Log Analysis, Event Correlation, Alert Monitoring
- **Incident Response:** Incident Triage, Investigation, Escalation, Documentation
- **Security Concepts:** Cybersecurity Fundamentals, Threat Detection, Security Operations Center (SOC) Processes

CERTIFICATIONS

- **Cisco Certified Ethical Hacker (CEH) – Cisco Networking Academy**
- **Introduction to Cybersecurity – Cisco Networking Academy**

WORK EXPERIENCE

SOC Analyst – March 2024 – Till date in Process IT Global Pvt. Ltd

- Working in a 24*7 Security operation center (SOC).
- Monitor security events and alerts in **Splunk Enterprise Security (ES)** to identify potential threats, suspicious activities, and security incidents.
- Perform initial triage and analysis of security alerts, validating true positives and escalating critical incidents to higher-level SOC analysts.
- Investigate security incidents by analyzing logs, network traffic, endpoint events, and correlation searches within Splunk ES.
- Monitor and manage security use cases, dashboards, and notable events to ensure timely detection and response.
- Document incident details, findings, and response actions while maintaining accurate records in ticketing and incident management systems.

Java Developer - September 2022 – August 2023- PwC (Payroll of Infocus Technologies)

- **Developed and maintained RESTful APIs using Spring Boot and Java.**
- **Worked with Thymeleaf, JPQL, and SQL queries, including complex joins and database operations.**

- Optimized application performance by debugging issues and improving API response times.
- Designed and implemented business logic using Java algorithms and object-oriented programming principles.
- Maintained unit test coverage above 75% using JUnit and mocking frameworks.
- Performed backend API testing using Postman to ensure functionality and reliability.
- Used Maven for project build, dependency management, and deployment processes.
- Ensured code quality and compliance with coding standards using SonarLint and SonarQube.
- Retrieved, updated, and managed data in relational databases using SQL.
- Worked with STS (Spring Tool Suite) and Eclipse IDE for application development and testing.
- Collaborated with team members to resolve defects, enhance application features, and support production issues.

TECHNICAL SKILLS

Cybersecurity

- Splunk Enterprise Security (ES)
- CrowdStrike Falcon
- AIOps
- Metadata
- Security Monitoring
- Incident Response
- Log Analysis
- Alert Triage
- Event Correlation

Programming & Development

- Java
- XML
- Spring Framework
- Spring Boot
- REST APIs
- Thymeleaf

EDUCATION

- Bachelor of Engineering, Civil Engineering(2018-22) , Jadavpur University
-
